

# SNEEZE HABIT RAP

Hey, learn something new-you're never too old

Here's a new way to fight off colds.

Don't cover your face

With your hands when you sneeze,

Just cough on your cuff and

Sneeze on your sleeve.

Sharing is good, but in this case

Keep your germs to yourself - so we'll all be safe.

And remember this before you eat,

Or after using the restroom please,

Washing your hands will always be

The very best way to fight off disease.
